SUBJECT: Contract HF-8141 Close out

Dear Jim:

This letter provides information you requested in order to close out the subject contract.

1. There has been no notice or claim of copy right infringement received by the contractor with respect to any material delivered under this contract.
2. Maintenance parts, tools and test equipment were made available to our personnel to perform the maintenance required. The control of this property was administered by the Government at the local operating site. There is not government furnished or residual property from this contract requiring disposition.
3. Patent and Royalty reports were not required.
4. Attached are photostates of two airline tickets to support a major transportation claim of \$257.63. Unfortunately we erroneously billed a total of \$299.18 for major transportation associated with this trip. The difference or \$41.55 was spent for other trip expenses which are actually recovered through our hourly rate. This over-claim is being credited to our first invoice on Contract HF-8142.

If you require additional information, please call me.

Sincerely,

STATINTL
